Attention: Mr. Barry Newman

October 2, 2006

Dear Barry,

We are currently using two Classic Marine CLM – 400 air purifiers on Grey Lady. This vessel is a 44 meter, 300 passenger high speed catamaran which operates between Hyannis, Massachusetts and Nantucket Island.

The passengers and crew were complaining about mildew, stale air, and other odors in the cabin spaces. This vessel is fully carpeted with upholstered seats. It also is climate controlled, so that there is a limited amount of cabin air exchange taking place.

We began using these air purifiers three years ago and have had excellent results. This is a two deck vessel so we put one purifier on each deck. The cabin odors have been eliminated, ( as long as the purifier is turned on and operating ).

Thank you for providing us with a simple to use and dependable product. Please feel free to contact me for any further questions.

Sincerely,  
*Richard Moore*
