Subject: RE: FOLLOW UP

Hi Barry,

She loves the machine. She tells me that she turns it on during an appointment and the odor is not there for her next patient. She said all you smell is clean air. I have also used it in my car that leaked water inside the car and soaked the rug. The car sat for a month and when I opened the door the smell was horrible from mildew. I placed the machine inside the car and ran it overnight with the doors and windows closed. When I opened the door the next morning the odor was gone.

Thanks,
Roland Menard
